

Explorer - Configuration

configuration example "Mozilla Firefox Browser":

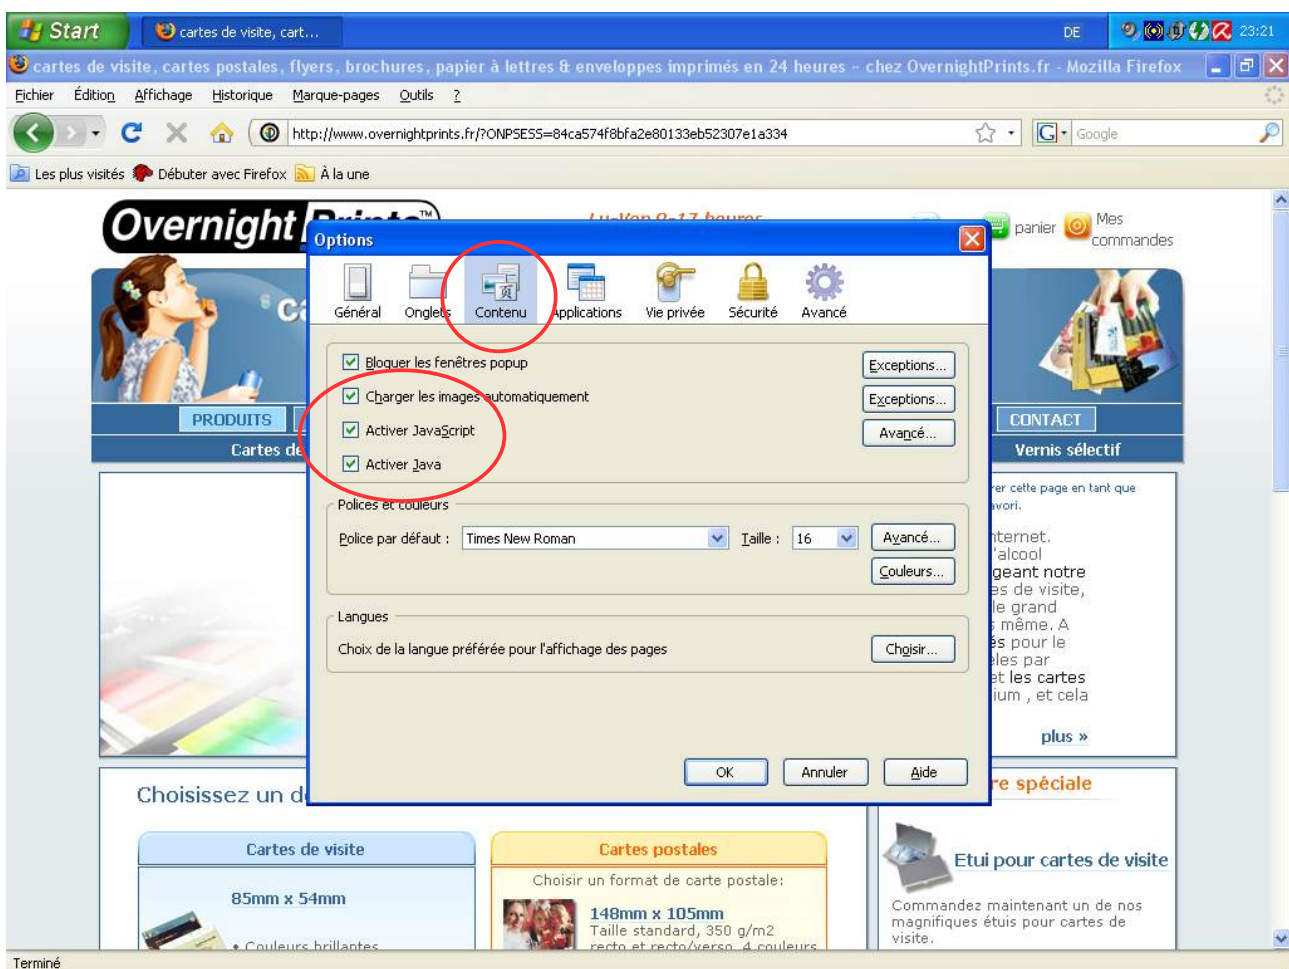

- pay attention to the little differences between "Mozilla Firefox" under several operating systems there are different menu structures (also called "tabs")

Windows XP / Windows Vista & Mozilla Firefox:

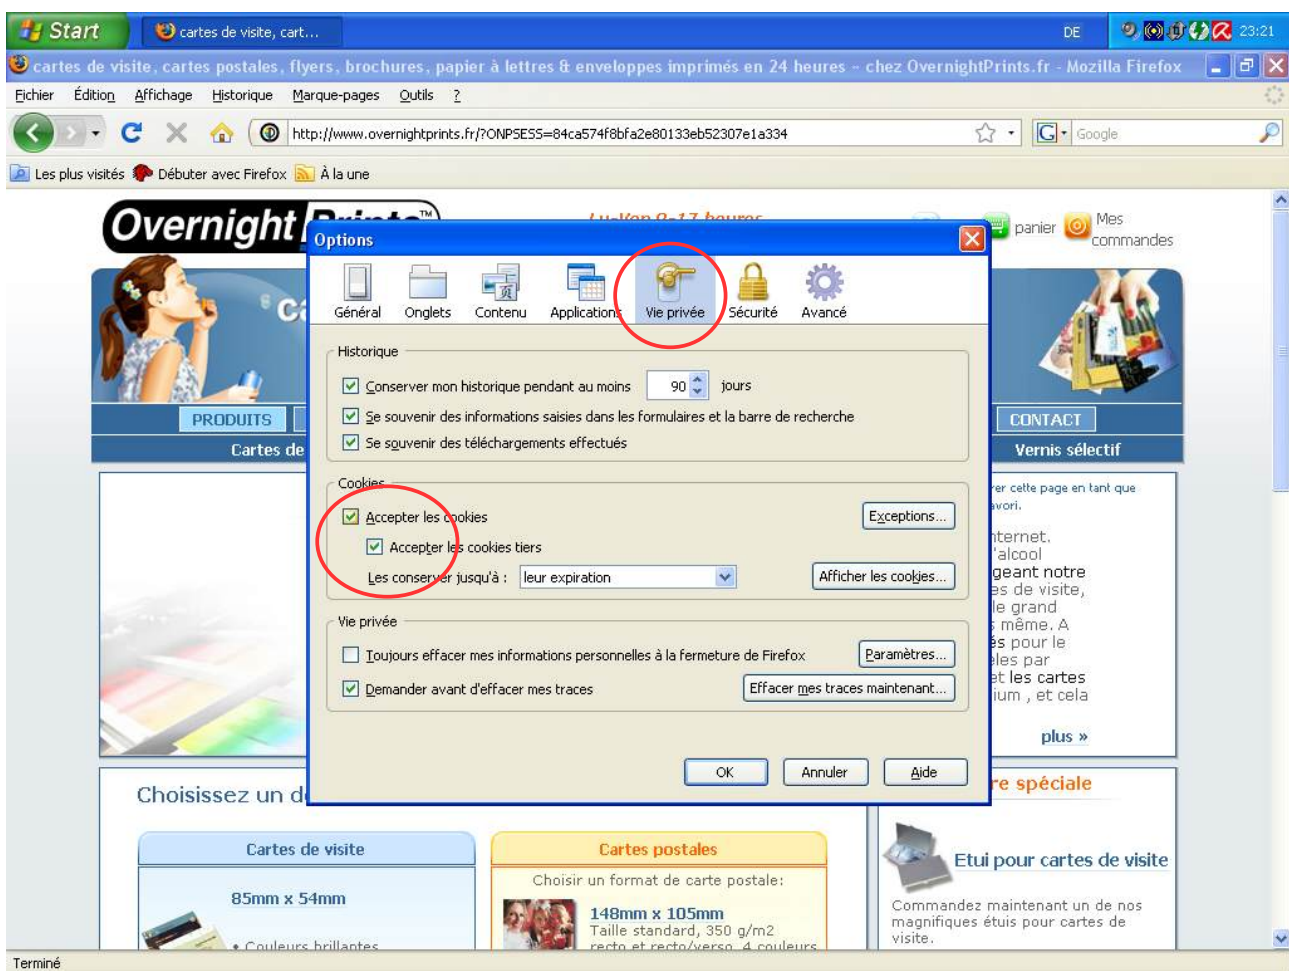

- start your browser
- menu "Extras":
choose in it the undermost tab "Options", "Preferences" or "Properties"

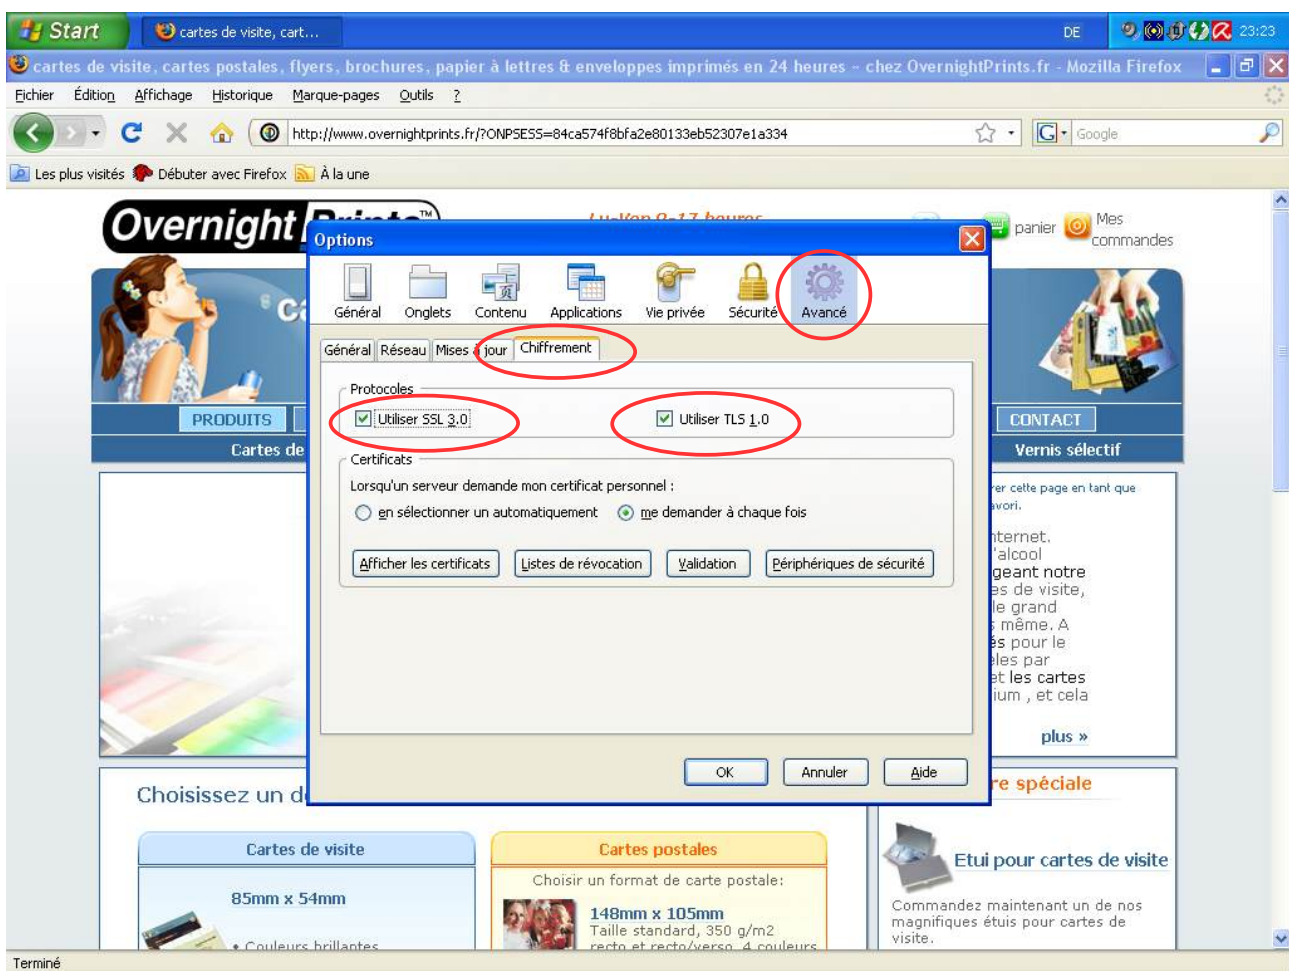

- menu of the "Firefox Options":
"Contenu" >> enable "Charger les images automatiquement", "Java" & "JavaScript"

- menu of the "Firefox Options":
"Vie privée" >> enable "Accepter les cookies"

- menu of the "Firefox Options":
"Avance" >> "Chiffrement" >> "SSL 3.0" & "TLS 1.0"
